Letter Of Recommendation

Hereby I send you the recommendation letter for **Mr. Saurabh Banore**. I have known Saurabh for the past 6 semesters. I am his guide for the final year project and I have also had the opportunity of teaching him the courses listed below:

- Computer Graphics (IV Semester)
- Database Management Systems (VI Semester)

Based on our association, I consider Saurabh to be one of the most diligent and perseverant students as he has performed to his utmost capability throughout his tenure in the college.

Saurabh has done his final year project work sponsored by a software company Persistent Systems Ltd. (<https://www.persistent.com>) under the guidance of me and a corporate mentor. As his guide for the project, I can vouch for his excellent ability for logical and intuitive thinking, decision making and problem-solving skill. His curiosity to learn concepts and explore new areas of knowledge places him well ahead of the other students. During the project work, he has also exhibited excellent leadership skills by leading his fellow team members and delivering the prototypes as per the company's requirements. His project won 2nd prize in the domain of AI / Machine Learning in the project competition held at Pune Institute Of Computer Technology (Maharashtra, India).

Over and above academics, he has participated in various technical events and has won numerous programming contests. His team 'locked_mutex' was selected for the onsite regionals of ACM ICPC 2016. Furthermore, he was amongst the top 1% of the total 99,473 participants in Codevita 2017 which is a global programming contest by TCS. Saurabh deserves a special mention for mentoring his juniors for competitive programming. He along with his team regularly arrange sessions for their juniors for discussing the solutions of the problems from previous contests and doubt clearing. He has also done numerous projects varying from Deep Learning, Data Structures and Algorithms, Web development and Android.

I believe that Saurabh will perform well in the internship and will prove to be a great value of your institution. I am convinced, that this internship will be a great opportunity for him to develop further his abilities. Please feel free to contact me if you need further information.

Sincerely,

Dr. Deepa Deshpande
Associate Professor

Jawaharlal Nehru Engineering College, Aurangabad

Vision:

To create self-reliant, continuous learner & competent technocrats imbued with human values.

Mission:

- Imparting quality technical education to the students through participative teaching-learning process.
- Developing competencies amongst the students through academic learning and practical experimentation.
- Inculcating social mindset and human values amongst the students.
